

RAUS COMPANIES

CAPABILITIES STATEMENT

Raus Companies was founded in 1972 and consist of Raus Construction LTD. and Raus Restoration. Raus Construction provides ground up general contracting and interior build-outs to \$10MM. Raus Restoration provides a full range of emergency mitigation services 24/7/365. We are located in Houston, TX. and self-serve our clients in Texas and serve clients nationwide through our network partners.

Competitive Positioning

- ✓ **Partnered Solutions**— We partner as a subcontractor for multiple Prime and Job Order Contractors in Texas. We utilize our national network partners to serve our restoration clients outside of the Houston Metro area.
- ✓ **Best Value**— Discounted Time and Material Pricing. Web based T&M pricing software that meets ALL FEMA audit requirements.
- ✓ **Industry Experience** - Subject matter experts offering full emergency mitigation and construction Project Management Solutions.
- ✓ **Product Differentiation**— Value added Emergency Ready Profile (ERP). A “no charge” facility site evaluation that identifies critical systems, chain of command, logistics and emergency services protocol prior to a sudden and unexpected facility loss event.

Services Overview

- **Moisture Control & Structure Drying** - Desiccant and refrigerant dehumidification drying of facilities. Water/flood water extraction. Controlled demolition of wetted interior structural material.
- **Source Contaminate Removal** - Smoke, odor and soot removal from structure components.
- **Contents Restoration** - Cleaning and deodorization of general contents.
- **HVAC** - Emergency HVAC decontamination, clean and deodorization.
- **Mold** - Full mold remediation of affected building structure components and general contents.
- **Document/Electronics/Equipment** – Full Freeze Drying and processing of flood, fire and mold damaged documents, microfilm, microfiche, magnetic media and X-ray's. Full restoration of electronics and equipment.
- **Project Management** - On site coordination of all aspects of emergency mitigation and restoration for multiple types of facilities.
